Estimates and assumptions are continuously evaluated and are based on management’s experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

In particular, information about significant areas of estimation uncertainty considered by management in preparing the financial statements includes:

- The ability of the Company to continue as a going concern for the next fiscal year;
- assessment as to whether any impairment exists in the valuation of its assets;

i) Firebird Nickel

The Firebird Nickel Project (“Firebird”) is located approximately 14 kilometres northwest of Stony Rapids, Saskatchewan and ALX acquired a 100% interest by staking most of the claims in May of 2019. The project is prospective nickel, copper, and cobalt. Included within the Firebird Nickel Project are the Axis Lake, Currie Lake, and Rea Lake claims. ALX acquired a 100% interest in these claims from three separate vendors by paying a total of \$52,000 and issuing 3,950,000 common shares valued at \$133,500. The vendors retained a 2.0% net smelter returns royalty (“NSR”) and the Company has the right to purchase up to half of the NSR for a total of \$5.0 million. .

i) Firebird Nickel - continued

On August 21, 2020, ALX entered into an option agreement with Rio Tinto Exploration Canada Inc. (“Rio Tinto”) on the Company’s Firebird Nickel Project. Rio Tinto may acquire up to an 80% interest in Firebird by incurring a total of \$12.0 million in exploration expenditures over six years and by making cash payments to ALX totaling \$125,000, as outlined in the following summary:

- Rio Tinto may acquire a 51% interest in Firebird (the “First Option”) by funding \$3.0 million in exploration expenditures within three years of the agreement date;
- Carrying out an initial exploration program of not less than \$150,000, to be completed within six months of the Effective Date (completed); and
- Making a \$50,000 cash payment to ALX within 45 days of the Effective Date (received).

Upon Rio Tinto acquiring a 51% interest in Firebird, it may elect to form a joint venture on terms established by the parties in a separate joint venture agreement, or give notice to ALX that it wishes to pursue its right to acquire up to an 80% interest in the Project (the “Second Option”). To earn an additional 29% interest in Firebird Rio Tinto must:

- Fund an additional \$9.0 million in exploration over a second three year period for total expenditures by Rio Tinto of \$12.0 million over six years; and
- Make a second cash payment to ALX of \$75,000 for total cash consideration of \$125,000.

The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

(a) Credit risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash balances. The Company manages its credit risk on bank deposits by holding deposits in high credit quality banking institutions in Canada. Management believes that the credit risk with respect to receivables is remote.

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company ensures that there are sufficient funds to meet its short-term business requirements, taking into account its anticipated cash flows from operations and its holdings of cash and cash equivalents.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

(d) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. With respect to financial assets, the Company's practice is to invest cash in cash equivalents in order to maintain liquidity. Fluctuations in interest rates affect the fair value of cash equivalents.

(e) Capital management

The Company's policy is to maintain a strong capital base so as to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company consists of equity, net of cash and cash equivalents.

There were no changes in the Company's approach to capital management during the period ended September 30, 2021 or the year ended December 31, 2020. The Company is not subject to any externally imposed capital requirements.

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
