i) Firebird Nickel

The Firebird Nickel Project (“Firebird”) is located approximately 14 kilometres northwest of Stony Rapids, Saskatchewan and ALX acquired a 100% interest by staking most of the claims in May of 2019. The project is prospective for nickel, copper, and cobalt. Included within the Firebird Nickel Project are the Axis Lake, Currie Lake, and Rea Lake claims. ALX acquired a 100% interest in these claims from three separate vendors by paying a total of \$52,000 and issuing 3,950,000 common shares valued at \$133,500. The Company is exposed in varying degrees to a variety of financial instrument-related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

(a) Credit risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash balances. The Company manages its credit risk on bank deposits by holding deposits in high credit quality banking institutions in Canada. Management believes that the credit risk with respect to receivables is remote.

The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. (c) Foreign exchange risk

With the exception of certain investments, the Company is not exposed to foreign currency risk on fluctuations considering that its assets and liabilities are stated in Canadian dollars. Fluctuations in the value of the Australian dollar can impact the fair value of Company's securities and or the value of the Australian dollars received should these securities be divested.

(d) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. With respect to financial assets, the Company's practice is to invest cash in cash equivalents in order to maintain liquidity. Fluctuations in interest rates affect the fair value of cash equivalents.

(e) Capital management

The Company's policy is to maintain a strong capital base so as to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company consists of equity, net of cash and cash equivalents.

There were no changes in the Company's approach to capital management during the period ended September 30, 2022 or the year ended December 31, 2021. The Company is not subject to any externally imposed capital requirements.

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
